

SIMPLE, SCALABLE
AUTOMATION

FusionPro® Server Lite

The Power of Server, without the Programming

FusionPro Server Lite is the power and automation of FusionPro Server without the need for any programming. FusionPro Server Lite gives organizations faster composition speeds, generating hundreds of thousands of document pages per hour, along with **easy automation, so you can scale to any size job**. FusionPro Server Lite leverages a Hot Folder, which is ready to compose outputs at a moment's notice. Simply drag your input files and your job will automatically run, compose, and place the final composition in an output folder. Modernize traditional print models and expand your business through scale. Drag. Drop. Done.
